Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15 – 17, 27, 29 – 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 5,938,736 to Muller et al in view of U.S. patent 6,415,354 to Joffe et al.

With regard to claim 15, Muller et al teach segmenting packet header portions MAC SA and MAC DA into predetermined lengths in col 10 lines 25+; using segment identifiers corresponding to a range of segment values as taught in col 10 lines 19+ (see arbiters 501 – 504); combining the extracted header data values, as taught in col 10 lines 29+, wherein this is done to produce a search key 545; and further wherein this search key is used to form a comparison in a CAM as described in col 11 lines 5+.

Muller et al does not, however, explicitly teach the CAM to be a ternary CAM.

Joffe et al teach a CAM which also utilizes a search key, wherein the CAM is of a ternary type. See col 1 lines 36+.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided Muller et al's CAM with a ternary CAM, in light of the teachings of Joffe et al, in order to provide a means for performing the search in as efficient a means as possible.

Art Unit: 2616

With regard to claims 16 - 17, it is noted that in col 9 lines 48+, IP source and destination fields are discussed.

With regard to claims 29 - 30, see the discussion above and note that member 360 has the control logic needed to implement the method described in claim 15.

With regard to claim 31, it is noted that the "command set" described in col 16 lines 50+ are a "computer program product" used to operate the CPU 161.

3. Claims 1 - 14, 18 - 26, 28 are allowed.

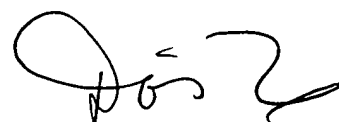

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Blount whose telephone number is 571 - 272 - 3071. The examiner can normally be reached on M-F 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Doris To, can be reached on 571 - 272 - 7269 . The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
